

ctda

creative solutions

Every company today, large or small, needs to project a complete image in order to maximise its impact in the market-place. With specialist expertise in all aspects of corporate image we are able to provide a unique service within a broad-based design consultancy.

To this end we have been successfully operating a specialist design unit for many years creating and implementing projects in the UK and overseas.

Our approach is a simple one - we believe in combining practicality with imagination, to produce creative solutions that are tailored to match the client's needs and resources.

So whether you're looking for a basic concept or a fully managed design and implementation package, you can be sure that we will offer you practical, creative solutions and total service, to make your image look complete.

If you would like to arrange a meeting or discuss your requirements further, contact Matt Thompson **01992 890980** m@ctda.co.uk

exhibitions

▲ Evotec
World wide

With experience in all aspects of exhibition and display work, we follow each task through from the initial creation of design visuals, working drawings, construction, to completion on site.
